

\$82.1M of indirect spend, and one category is eight times the peer median.

Indirect spend is the recurring operating cost that sits outside your program delivery and outside your payroll — it is the only thing we work. What follows compares the categories your Form 990 names separately against organizations of comparable size and type: a starting point for a question, never a verdict on how you are run.

\$82.1M

INDIRECT SPEND, AS FILED

Salaries, depreciation and interest are excluded — they are not indirect and not ours to work.

\$43.7M

NAMED BY CATEGORY

Seven categories. A further \$38.46M sits in lines the filing does not name.

55

CATEGORIES ERA WORKS

The baseline covers every one that applies to you, not only those a form happens to disclose.

1

PRIORITY THE PUBLIC RECORD CAN ALREADY EVIDENCE

Operating supply, at the 98th percentile of 2,573 filers.

Evidence depth: four of nine layers carry something for this organization — filed, benchmark, derived and registry. Operating, retrieved, engagement and verified are empty, and are shown as empty rather than filled.

Where each category sits

CATEGORY	FILED	YOUR % OF REVENUE	PEER MEDIAN	PEERS	POSITION
Operating Supply	\$37.97M	19.36%	2.40%	2,573	Well above · 98th
Freight / Small Parcel	\$2.63M	1.34%	0.79%	140	Above · 64th
Marketing Services	\$482K	0.25%	0.26%	7,371	Below · 49th
Fleet Management	\$2.12M	1.08%	1.21%	396	Below · 46th
Travel	\$450K	0.23%	0.37%	8,769	Below · 39th
Office Supplies	\$1.37M	—	—	—	Not yet compared
Professional Services: Legal	\$638K	—	—	—	Not yet compared

Each category is compared against every nonprofit filer that breaks that category out separately, measured the same way — category spend as a share of total revenue. Cohort sizes differ because not every organization discloses every line, and a category needs at least 30 filers before we will state a position. The categories a filing does not break out are sized in the baseline, not here.

Why operating supply, and not simply because it is largest

At **19.4% of revenue** against a **2.4% peer median** it sits at the 98th percentile of 2,573 filers — roughly eight times. A retail and donated-goods operation genuinely buys more supply than most nonprofits, so some of that gap is your model rather than your buying. How much is the question, and it is the one worth answering first.

Where the filing looks competitive

Fleet sits at the 46th percentile and **travel** at the 39th, with marketing at the median. On the public record these already look well bought, so they are not where this Report points first. A baseline covers every applicable category and would confirm it either way.
