

PREPARED EXCLUSIVELY FOR

Care Comes First. So Costs Drift.

Planned Parenthood South Atlantic

14 health centers — NC, SC, VA, WV — 50,000+ patients/yr
Healthcare / Nonprofit · \$59M annual revenue

Contingency-based — a share of verified savings. No savings, no fee.
July 27, 2026 · ERA Group

WHY THIS, WHY NOW

The conditions that let indirect costs drift.

Multi-state, donor-funded footprint with spend split across 14 sites and no central procurement.

- Recent multi-site expansion
- No centralized purchasing function
- Costs renewed site-by-site

THE OPPORTUNITY WE SEE — ANNUAL INDIRECT-SPEND RECOVERY

\$600K–\$1.4M

Roughly 1%–2.4% of revenue — an outside-in estimate from public filings and ERA's category benchmarks, sized in the pages that follow and confirmed only by a no-cost baseline against your actual contracts.

\$180K–\$420K

in Medical Supply

\$95K–\$240K

in IT & Telecom

1,000+

ERA projects with quantified savings

WHERE THE OPPORTUNITY SITS

The largest indirect categories visible from the outside.

These are the categories that stand out in Planned Parenthood South Atlantic's public filings — not the full review. ERA benchmarks 50-plus indirect categories across seven expense groups; the baseline covers every one that applies. Ordered by size.

CATEGORY	EST. ANNUAL OPPORTUNITY
Medical Supply HIGH Disposables, devices, lab High-volume clinical supply bought site-by-site, rarely consolidated.	\$180K–\$420K 6%–18% of category
IT & Telecom HIGH Connectivity, SaaS, support Per-site contracts and overlapping software licenses.	\$95K–\$240K 10%–25% of category

Ranges are outside-in estimates for illustration, not quoted savings. Actual figures are established by the no-cost baseline against your contract data.

WHAT WE CAN'T KNOW FROM THE OUTSIDE

An honest account of the estimate's limits.

Public filings show the shape of the spend, not the contracts behind it. Three things an outside-in view cannot establish — and exactly what the baseline resolves:

- 1 Actual indirect spend mix by category
- 2 Which categories are already under long-term contract
- 3 Vendor relationships already optimized

THE NO-COST BASELINE

A 30-day baseline replaces every estimate above with your actual contract data — at no cost and with no obligation. Most organizations are already competitive in some categories; the baseline names both the real opportunities and the areas already performing well. Nothing changes without your approval — every recommendation is yours to accept or decline.

WHO THIS IS FOR

The leaders who own indirect spend.

Jennifer Black
President & CEO

Mission delivery and financial stewardship

Nancy Long
Chief Financial Officer

Budget, margin, multi-site cost control

HOW ERA WORKS

Contingency-based — a share of verified savings. No savings, no fee.

ERA finds savings across 50-plus indirect categories in seven expense groups; you implement; ERA takes a share of what is verified. There is no upfront cost and no fee without savings.

THE NEXT STEP

A 30-minute scoping call to confirm the categories worth a no-cost baseline.
