
What the filing reveals is only the beginning.

A Form 990 shows selected expense lines. ERA brings the category specialists, contract and invoice analysis, market knowledge, implementation support and measurement needed to examine the full indirect-spend portfolio.

Across every applicable category, the objective is the same: validate what is already working, recover value where the evidence supports it, and return more dollars to mission.

55 categories · one evidence-led process · results measured after implementation
