

Bethesda Health Group saves \$128K annually by partnering with ERA Group

The client

Bethesda Health Group is a premier nonprofit senior care provider based in St. Louis, operating nine facilities across independent and assisted living, skilled nursing and memory care, rehabilitation, therapy, hospice, and home healthcare.

The challenge

Bethesda sought a partner to deliver meaningful, sustainable funding by reducing overhead — and to bring best practices in vendor selection and management tailored to its unique expenses.

The solution

ERA Group (formerly Expense Reduction Analysts) analyzed diverse overhead categories and applied category-specific expertise, delivering sustainable savings, trusted-advisor guidance, and simplified, standardized supplier-management processes.

The result

Bethesda achieved sustained improvements in pricing and vendor service while saving over \$128,860 annually across four key spend categories. Beyond financial savings, ERA's support enhanced efficiency, vendor relationships, and operational effectiveness.

Total annual savings realized

\$128,860

Hospice pharmaceuticals	\$52,160 32%
Food services	\$34,700 27%
Payroll	\$26,500 17%
Office supplies	\$15,500 18%

"Saving time, saving money, better service from vendors; ERA was instrumental in helping us achieve the trifecta! What company would not appreciate that?"
