

\$3.5 Million saved for Delaware Hospice

The client

Delaware Hospice is the largest nonprofit provider of hospice, palliative, and transitional care to patients throughout Delaware and parts of southeastern Pennsylvania.

The challenge

Though fiscally responsible, leadership wanted to ensure they were receiving the greatest possible value from contracted providers. Rising costs across medical supplies, pharmaceuticals, administrative services, and telecommunications pressured resources that could otherwise go to patient care — a pressing example being an answering service that struggled with accuracy and was set to raise prices.

The solution

ERA experts conducted a comprehensive review of Delaware Hospice's expense base, working closely with financial and clinical staff across medical supplies, ambulance services, durable medical equipment, IV therapy, pharmaceuticals, payroll/HR administration, landscaping, snow removal, and telecommunications. For the answering service specifically, ERA identified a higher-quality provider at a lower cost, and Delaware Hospice transitioned to one that better met its needs.

The result

ERA delivered \$3.5 million in total savings — captured across both large-scale and niche expense areas — providing significant additional cash flow to reinvest in patient care and expand its impact in the community.

Total annual savings realized

\$3,500,000

- Medical Supplies
- Ambulance Svc & Durable Med Equipment
- IV Therapy & Pharmacy Benefit Management
- Landscaping, Snow Removal & Payroll
- HR Administration
- Answering Services

"ERA has assisted us in saving over \$3M in reviewing over a dozen expense categories. They provide expertise in all these areas & assist us in operational areas beyond cost savings. The relationship has been outstanding. I would highly recommend other organizations that struggle with cost control, taking advantage of their services."
