September 5, 2026

Raisa Ciobanu

Chief Financial Officer
Goodwill Industries of South Florida
2121 NW 21st St
Miami, FL 33142-7317

Dear Raisa,

We prepared the enclosed Executive Opportunity Report before reaching out, because a useful conversation should begin with evidence rather than a capability presentation. For an organization whose mission is helping people get and keep meaningful work, every dollar that does not need to remain in indirect operating expense is a dollar that can stay closer to that mission.

The Report was built from public information only. It shows what the available record suggests may be worth understanding, what appears less important, and — just as importantly — what the public record cannot tell us. We treat those patterns as questions to validate, not conclusions about how Goodwill Industries of South Florida is being run.

ERA Group has reviewed more than \$2.25 billion of indirect spend across 6,420 engagements at 916 organizations. Our work is focused on recurring operating costs outside program delivery, using category specialists to test whether current arrangements remain competitive.

If the analysis is directionally useful, we would welcome a short conversation. If your current arrangements are already competitive, that is a valuable answer too. Nothing changes without your approval, incumbent suppliers often remain, and if we do not create verified recovery, there is no fee.

Best regards,

A handwritten signature in blue ink, appearing to read "John Wylie".

John Wylie

Consulting Partner · ERA Group

Your Report is live online

portal.wpp-us.com/goodwillsouthflorida-benchmark

No code. No form. No login.

What this is, why we prepared it, and what it does not claim.

One page of orientation before any numbers. We built this from your public filings before contacting you, because a useful conversation should begin with evidence rather than a capability presentation.

\$9.7M

 a year

recovered from what you currently pay suppliers,
across six categories of indirect spend

\$6.0M a year on our weakest quartile

Not a range. The **median outcome across 533 completed ERA engagements** in the **six categories** below — operating supply, uniforms and linens, small parcels, payroll and HR, fleet, insurance.

1,913 of 2,468 completed engagements
recovered value — and some returned nothing

How it was built

Your public filing. Nineteen expense lines; twelve are indirect and six carry a figure.

A peer comparison. Each category against every nonprofit filer that breaks it out separately.

Your filing names its suppliers. Part VII Section B states three service relationships, the service and the amount — three of the six come from there.

Reading the position

Above the median is a question, not a verdict. Your model is one reason a category sits high.

At or below it is not proof of competitive buying — the median is drawn from organizations that have mostly never tested either.

What follows

- 1 What we found, and what follows
- 2 What your own numbers say
- 3 The position, as we read it
- 4 Where we looked
- 5 Priority 1 — Operating supply
- 6 Priority 2 — Uniforms and linens
- 7 What this rests on
- 8 What happens next

What we looked at, and what we did not

\$45.3M

MODELLED

Six categories — operating supply, uniforms and linens, small parcels, payroll and HR, fleet, insurance. **533 completed engagements** stand behind the figure above.

\$0.93M

TO BE QUANTIFIED

Marketing and travel. We work both — fewer than ten completed engagements each, so a median would be noise. **Upside.**

\$35.9M

NEEDS YOUR DETAIL

Mostly occupancy. We work everything in it but the rent, and a 990 reports them as one figure. **Upside.**

ERA works **55 categories**. Your filing reports **12 lines of indirect spend**, \$82.1M in total, and all twelve appear in this Report. The \$9.67M above is the first card only — six categories, named on it.

WHAT WE FOUND, AND WHAT FOLLOWS

Five things stood out. None of them is a conclusion.

A short summary of what our reading suggested and why each section is here, so you can decide how much of the detail is worth your time.

WHAT YOU BUY IS WHAT YOU SELL**Your largest indirect line is not overhead. It is inventory.**

The biggest expense your filing breaks out apart from people is materials and supplies. In most organizations that line is small and administrative. In yours it is close to the work itself.

Why it matters: it means the usual assumption about this line is wrong, and we have said so before quoting anything.

YOUR FILING NAMES ITS OWN SUPPLIERS**Three relationships are stated in your own words, with amounts.**

Part VII Section B asks for the highest-paid contractors, what each was engaged to do and what each was paid. Yours describes the service. Most filings say less.

Why it matters: it lets us speak about specific arrangements rather than about categories in general.

THE LARGEST LINE IS NOT THE STRONGEST EVIDENCE**The category we can say most about is not the one with the most money in it.**

Depth of completed work and size of spend are different things, and here they do not point at the same category. We ordered what follows by evidence.

Why it matters: it is why the second section is not simply the second largest number.

ONE LINE IS A FIFTH OF EVERYTHING, AND WE LEFT IT ALONE**The single biggest cost after people is reported in a way we will not model.**

It combines something we work with something we do not, in one figure, and your return is not required to separate them. We named it and stopped there.

Why it matters: what we decline to estimate tells you as much as what we estimate.

THE ONE QUESTION THAT COULD CHANGE THE ANSWER**We do not know when any of this was last taken to market.**

Everything above describes structure. Whether it is competitive depends on something no filing records: when each arrangement was last tested, and against what.

Why it matters: if these were tested recently and held, this Report ends there — and that is a useful answer.

\$82.1M of indirect spend, six categories modelled, one is eight times the peer median.

Indirect spend is the recurring operating cost that sits outside your program delivery and outside your payroll — it is the only thing we work. What follows compares the categories your Form 990 names separately against organizations of comparable size and type: a starting point for a question, never a verdict on how you are run.

\$82.1M INDIRECT SPEND, AS FILED Salaries, depreciation and interest are excluded — they are not indirect and not ours to work.	\$45.3M NAMED BY CATEGORY A further \$36.84M sits in lines the filing does not name. ERA works 55 categories; the baseline covers every one that applies.	2 PRIORITIES THE RECORD CAN ALREADY EVIDENCE Operating supply, 98th percentile of 2,573 filers; uniforms and linens, 109 completed engagements. Six categories carry a figure.
--	--	---

Evidence depth: four of nine layers carry something for this organization — filed, benchmark, derived and registry. Operating, retrieved, engagement and verified are empty, and are shown as empty rather than filled.

Where each category sits

CATEGORY — AND WHAT IT IS IN YOUR OPERATION	FILED	YOUR % OF REVENUE	PEER MEDIAN	POSITION	WHAT ERA HAS RECOVERED HERE
Operating Supply Running the stores and processing donated goods	\$37.97M	19.36%	2.40%	Well above · 98th	21% median · 69 projects
Freight / Small Parcel Moving donated goods between sites and to customers	\$2.63M	1.34%	0.79%	Above · 64th	23% median · 89 projects
Marketing Services Donor and retail advertising	\$482K	0.25%	0.26%	Below · 49th	—
Fleet Management The trucks that collect donations	\$2.12M	1.08%	1.21%	Below · 46th	—
Travel Staff movement across the program	\$450K	0.23%	0.37%	Below · 39th	—

Each category is compared against every nonprofit filer that breaks it out separately, as a share of total revenue. A category needs at least 30 filers before we state a position, and the categories a filing does not break out are sized in the baseline, not here.

Why operating supply comes first At 19.4% of revenue against a 2.4% peer median it is roughly eight times, on 2,573 filers. A donated-goods retailer genuinely buys more supply than most nonprofits, so part of that gap is your model rather than your buying — how much is exactly the question. ERA has completed 69 operating-supply engagements at a median of 21%.	Being at the median is not the same as being competitive The median is drawn from organizations that have mostly never market-tested these categories either. It describes what is <i>normal</i> , not what is <i>available</i> . Of 2,660 completed ERA engagements, 2,649 recovered value — a median of 28% of category spend, and the weakest quarter still returned 14%. Almost none of those clients were outliers on a filing.
---	--

FILED Form 990 Part IX, FY2024 · BENCHMARK per-category cohorts as shown, 30-filer minimum · ERA RECOVERY completed engagements, median of category spend. Operating, retrieved, engagement and verified are absent. Full sources overleaf.

THE POSITION, AS WE READ IT

What 533 completed engagements suggest is worth testing here.

Each category below is your filed figure against the outcome our completed work in that category actually produced. It is the size of the question, not an estimate of what would be recovered at your organization.

CATEGORY	FILED	AT THE MEDIAN	MIDDLE HALF OF COMPLETED WORK
Operating Supply	\$37.97M	\$8.09M	\$5.13M – \$13.06M
Uniforms, Workwear & Linens	\$1.52M	\$427K	\$246K – \$641K
Small Parcels	\$2.63M	\$605K	\$361K – \$961K
Payroll and HR administration	\$476K	\$148K	\$83K – \$222K
Fleet Management	\$2.12M	\$314K	\$166K – \$698K
Insurance	\$558K	\$84K	\$45K – \$138K
Six categories	\$45.28M	\$9.67M	\$6.03M – \$15.72M

Why the total is not the sum of the extremes

Six categories do not all land at the bottom of their range, or all at the top. The middle column adds each category at its own median, which is the outcome most likely to describe the set. The range beside it is the middle half, not the best and worst case.

What we are not saying

We are not saying you are paying too much. We have not seen a contract, an invoice or a schedule of rates, and a filing cannot show whether a price is competitive. Sitting above a peer median is not overspending; it is a difference worth understanding.

BENCHMARK 533 completed ERA engagements, quartiles per category · **FILED** Form 990 · **DERIVED** arithmetic on filed figures only. No published band is used anywhere in this Report.

WHERE WE LOOKED

Every indirect line on your return, including the ones we left alone.

Twelve lines on your FY2024 return are indirect rather than people or non-cash. All twelve are below: six carry a figure, six do not, and the reason is stated for each.

FILED LINE	AMOUNT	WHAT WE DID WITH IT
MATERIALS AND SUPPLIES (line 24)	\$37.97M	Modelled · Operating Supply, 69 engagements
Part VII Section B — “LAUNDRY DISTRIBUTION”	\$1.52M	Modelled · Uniforms, Workwear & Linens, 109 engagements
FREIGHT AND POSTAGE (line 24)	\$2.63M	Modelled · Small Parcels, 89 engagements
Part VII Section B — “PAYROLL SERVICES”	\$476K	Modelled · Payroll and HR administration, 101 engagements
FLEET AND TRANSPORTATION (line 24)	\$2.12M	Modelled · Fleet Management, 13 engagements
Part VII Section B — “THIRD PARTY ADMINISTRATORS”	\$558K	Modelled · Insurance, 152 engagements
Occupancy (line 16)	\$24.38M	One figure covering rent together with utilities, maintenance and janitorial. 151 completed engagements in those three services, none in rent. Named, not modelled.
Fees for services — Other (line 11g), not itemised	\$5.53M	Your filing itemises \$2.55M of this line to three named relationships — three of the six categories above. The remainder is not itemised and we will not guess.
SERVICE CHARGES (line 24)	\$2.42M	A description we cannot read from outside. A question for the call, not a category.
All other expenses (line 24e)	\$1.50M	The catch-all. By definition it holds what did not fit anywhere else.
Office expenses (line 13)	\$1.37M	Line 13 mixes consumables with equipment. 204 completed engagements in office supply, and we still will not model a blended line.
Advertising and promotion (line 12)	\$482K	A category we work. Five completed engagements is below our floor of ten, so a median would be noise.
Travel (line 17)	\$450K	A category we work, at the 39th percentile of 8,769 peers. Eight engagements, below our floor of ten.
Fees for services — Legal and Lobbying (lines 11b, 11d)	\$701K	Fiduciary appointments. Not vendor spend.

\$36.84M is named and not modelled against \$45.28M that is. A line we declined to estimate is better shown than left out.

FILED Form 990 Part IX and Part VII B, FY2024. Contractor names are held on file and are not printed.

PRIORITY 1 OF 2

Operating Supply — \$37.97M

69 completed ERA engagements in this category. The middle half landed between **13.5% and 34.4%**, at a median of **21.3%** — \$8.09M against your filed figure. It sits at the 98th percentile of 2,573 peers. That is the size of the question, not an estimate of what would be recovered here.

What we see

\$37.97M reported as materials and supplies, the largest line on your return after people. At 19.4% of revenue against a peer median of 2.40%, it is the most distinctive position on the filing.

Why it matters

In most organizations this line is administrative and small. In yours it is close to the work itself. That does not make it inefficient — it makes it the line where a percentage point is worth more than anywhere else on the return.

What may be driving it

In our experience a supply line of this weight is usually several buying relationships reported as one figure, with different parts of the organization holding different pieces. That is category inference from completed work elsewhere, not a finding about you.

What we do not know

How many suppliers sit behind the line. Whether any of it is bought through a group purchasing arrangement. How much is resale inventory rather than consumed supply, which your return does not separate and which would change the answer materially.

What we would test first

The split between what is resold and what is consumed. Then the number of suppliers, and whether anyone in the organization sees the whole of it.

Potential impact if validated

At the median of completed work this category alone is \$8.09M a year. If the line turns out to be mostly resale inventory, the addressable part is smaller and we would say so before doing any work.

FILED Form 990 Part IX · **BENCHMARK** 69 completed ERA engagements · **DERIVED** peer percentile, 2,573 organizations · OPERATING, RETRIEVED absent

PRIORITY 2 OF 2

Uniforms, Workwear & Linens — \$1.52M

109 completed ERA engagements in this category. The middle half landed between **16.2% and 42.2%**, at a median of **28.1%** — \$427K against your filed figure. That is the size of the question, not an estimate of what would be recovered here.

Priority 2 is not the second largest line. Small Parcels and Fleet are both bigger. It is here because 109 completed engagements is the second deepest evidence we hold, and because your own return states the service and the amount for it. Size does not earn a section; evidence does.

What we see

\$1.52M paid to a single relationship your filing describes as laundry distribution. It is disclosed in Part VII Section B, which asks for your highest-paid contractors and what each was engaged to do.

Why it matters

Uniform and linen arrangements are among the longest-running contracts an organization holds. They renew quietly, the terms are rarely re-read, and the middle half of our completed work in this category ran from 16.2% to 42.2% — one of the widest spreads we see.

What may be driving it

A wide spread usually means the outcome depends less on the market than on how the agreement was structured and how long it has run. Category experience, not something your filing shows.

What we do not know

When the arrangement was last tested. What the agreement covers beyond distribution. Whether the amount disclosed is the whole of what is spent on this service or only what went to the one relationship your filing names.

What we would test first

The contract term and the renewal mechanism, and whether the last renewal was a re-marketing or a rollover.

Potential impact if validated

At the median, \$427K a year. Smaller than Priority 1 and considerably faster to resolve, because it is one agreement rather than a buying pattern.

FILED Form 990 Part VII Section B · **BENCHMARK** 109 completed ERA engagements · the counterparty is named in your filing and is not printed here

WHAT THIS RESTS ON

Every figure, where it came from, and what we could not see.

Nine layers of evidence exist in our work. Five of them are empty for your organization, and they are shown empty rather than filled.

LAYER	STATE	WHAT IT CONTRIBUTED
Filed	Present	Form 990 Part IX, FY2024, period 202412. Nineteen expense lines, twelve indirect, all twelve shown on page 9.
Registry	Present	Form 990 Part VII Section B. Three named service relationships with the service stated and the amount disclosed.
Benchmark	Present	533 completed ERA engagements across the six categories, quoted as quartiles of what those engagements produced.
Derived	Present	Peer percentiles against organizations of your type, and arithmetic on filed figures only.
Operating	Absent	Nothing found specific enough to this organization to be worth stating. Omitted rather than filled.
Retrieved	Absent	No verified quotation from your own published material.
Ecosystem	Absent	No dated external event connected closely enough to your organization to print.
Engagement	Absent	You have not told us anything yet. This is the layer that only exists after a conversation.
Verified	Absent	Nothing has been checked against a contract, an invoice or a schedule of rates.

FILED	REGISTRY	BENCHMARK	DERIVED	OPERATING	RETRIEVED	ECOSYSTEM	ENGAGEMENT	VERIFIED
✓	✓	✓	✓	—	—	—	—	—

No inference is stated in this Report except where it is labelled as such, in italics, and attributed to category experience. You will find two of those, on pages 10 and 11. No published market range is used anywhere: every percentage in this document is the outcome of engagements ERA has finished.

WHAT HAPPENS NEXT

A conversation. That is the whole of the ask.

There is no proposal in this document and no scope of work. The next step is replacing what we assumed with what you know.

STEP ONE**A conversation**

We walk the operating supply question together and you tell us what the filing could not: how much of it is resale, and who buys it.

Costs you: the time it takes.

STEP TWO**A no-cost baseline**

If it is worth going further, we replace what we have inferred with your actual contract data — across every applicable category, not only the six shown.

Costs you: nothing.

STEP THREE**An options report**

Category by category, what we found and what we would do about it. You decide what, if anything, to pursue.

Costs you: nothing, and nothing changes without your approval.

AND IF THE ANSWER IS NO**That is a result too**

If your current arrangements are already competitive, we will tell you, and we will say which ones. That is worth knowing and it costs you nothing to establish.

Our fee: a share of what is actually recovered, after you have it. No recovery, no fee.

Every figure in this Report is live online. Change any assumption and the model moves with it — and if we have read something wrongly, the page will record your correction as yours.

portal.wpp-us.com/goodwillsouthflorida-benchmark

No code. No form. No login.

Everything you have just read was prepared before we ever spoke.

Some of it may prove accurate. Some of it may not. That is not the point.

The purpose of this Report is not to prove an estimate. It is to work out — using your own contracts and data — whether opportunity genuinely exists, and to tell you honestly when it does not.

The strongest working relationships do not begin with a proposal. They begin with somebody having done the reading first.

Whether we work together or not, we hope this reflects the preparation and the respect we bring before asking for any of your time.

What you can expect

We will tell you when you are already getting a good deal. If your arrangements are competitive, that is exactly what you will hear.

We recommend keeping incumbents whenever they are the right choice. The objective is not changing suppliers.

Every recommendation is supported by evidence. You see the data before any decision.

You remain in complete control. Nothing changes without your approval. Ever.

Our success depends on yours. If we do not recover value, there is no fee.

What we could see is the smaller half.

A Form 990 breaks out only the lines the IRS asks for. Most of what an organization actually buys never appears on one at all — waste, telecom, packaging, payment processing. The categories that never reach a return are where this usually goes.
