

Six categories examined. One evidence-supported priority. Two appear well bought.

Every indirect category your filing breaks out, compared against organizations of comparable size and type. Position is a starting point for a question, never a verdict on how you are run.

6CATEGORIES
EXAMINED

Every indirect line your filing breaks out, not a selection.

\$1.62MADDRESSABLE, AS
FILED

10.3% of revenue, as filed. What is examinable, not what is recoverable.

3

ABOVE PEER MEDIAN

Above median is a question, not a priority. 2 sit below it.

1EVIDENCE-
SUPPORTED
PRIORITY

Earned on a second evidence layer, not on size.

Evidence depth: four of nine layers carry something for this organization — filed, benchmark, derived and registry. Operating, retrieved, engagement and verified are empty, and are shown as empty rather than filled.

Where each category sits

CATEGORY	FILED	YOUR % OF REVENUE	PEER MEDIAN	PEERS	POSITION
Insurance	\$1.05M	6.67%	1.04%	10,953	Well above · 99th
Maintenance	\$264K	1.69%	1.00%	4,831	Above · 67th
Travel	\$105K	0.67%	0.37%	8,769	Above · 65th
Utilities	\$167K	1.06%	1.86%	434	Below · 26th
SaaS / Software	\$16K	0.10%	0.36%	1,155	Well below · 17th
Office Supplies	\$23K	—	—	—	No comparable cohort

Each category is compared against every nonprofit filer that breaks that category out separately, measured the same way — category spend as a share of total revenue. Cohort sizes differ because not every organization discloses every line, and a category needs at least 30 filers before we will state a position.

Why insurance, and not simply because it is largest

It sits at the **99th percentile of 10,953 filers** — six times the peer median as a share of revenue. It is also the one category where a second filing shows something a Form 990 cannot: your plan's Schedule A discloses **\$526K** of intermediary compensation across two relationships, covering 581 people. Two independent layers on one category is what earns it a page.

Where the filing looks competitive

Utilities sits at the 26th percentile and software at the 17th — both below the peer median as a share of revenue. On the public record these already look well bought, so they are not where this Report points first. A baseline covers every applicable category and would confirm it either way, which is worth knowing in its own right.
