Chief Financial Officer

Coastal Enterprises of Jacksonville
Jacksonville, North Carolina

Dear Chief Financial Officer,

We are sending the enclosed Executive Opportunity Report because we believe that every dollar that does not have to be spent on indirect expense is a dollar available for the people you place in work.

We prepared it before reaching out to you, from public information only. Its purpose is to present where the available evidence suggests opportunity, and where it does not. We treat these patterns as starting points of discussion rather than conclusions.

Your FY2024 filing breaks out **\$1.62 million** of indirect spend across six categories. Insurance is **\$1.05 million** of that, and your plan's Form 5500 Schedule A discloses **\$526 thousand** of intermediary compensation inside that one category. That disclosure is why the Report starts there.

ERA Group has reviewed more than \$2.25 billion of indirect spend across 6,389 engagements and returned over \$600 million to the organizations we work with. We are specialists in one thing: the recurring operating costs that sit outside your program delivery.

If any of it is directionally useful, we would welcome a short conversation. If the current arrangements are already competitive, that is a valuable conclusion as well – and it costs you nothing to establish.

Nothing about the way we work commits you to anything. No supplier changes without your approval, incumbent suppliers frequently remain, and if we do not create verified recovery there is no fee.

Best regards,

A handwritten signature in blue ink, appearing to read 'John Wylie'.
