

## Ninety minutes, and you will know whether any of this is real.

### Who should be there

You, and whoever owns the general ledger. Nobody else is needed and nothing has to be prepared.

### What happens

We put the affiliate comparison on the table and you tell us what is in the materials and supplies line. That single answer either closes the question or opens it.

### What you leave with

A written read of where your position is explained by treatment and where it is not — whether or not you engage ERA. It is yours either way.

### Why it is worth it regardless

If the line reclassifies, you have an independent confirmation of something you believed. If it does not, you have found \$37.97M that nobody has tested.

**Would you give us ninety minutes?** Your Brief is also live online — the code on the letter opens it. No code. No form. No login.
